SOVIET JOURNAL OF COMPUTER AND SYSTEMS SCIENCES

(formerly Engineering Cybernetics)

CONTENTS FOR 1987

Number 1

	English Page	Russian Page
A.B. Kurzhanskiy and O.I. Nikonov: Adaptive Processes of Guaranteed Control	1	3
A.G. Alekseyev, V.A. Kezhayev, and A.I. Subbotin: A Special Problem of Integer Programming	14	16
B.S. Khynku: On the Problem of Search for a Lexicographic Sequence of Maximal Problems with Connected Constraints	19	21
A.K. Khaletskiy: On the Sequential Solution of a Convex Programming Problem	23	26
B.V. Pel'tsverger and O.V. Khavronin: A Decompositional Approach to the Problem of Synthesizing a Transport Network with a Fuzzy Use Period	29	32
K.N. Abayyldanov, N.D. Astakhov, and I.Kh. Sigal: The Problem of Determining the Optimal Order of Servicing Objects with Allowance for Change of Equipment	35	37
E.V. Tsoy: A Method of Solving a Concave Problem of Generalized Mathematical Programming	37	40
A.I. Panasyuk: Decomposition for Approximate Calculation of an Optimal Control	41	44
L.B. Goroshchenko: A Method for Allocating the Software Resources of Control Systems	47	49
A.F. Petrov and M.A. Shneps: Optimization of Grade-of-Service Indices in a Telephone Network in the Case of a Nonpersistent Subscriber	53	56
G.I. Falin: The Ergodicity of Multilinear Queueing Systems with Repeated Calls	60	63
G.D. Kartashov: An Invariant Solution of the Variable Regime Problem	66	78
Ye.I. Veremey: Ensuring a Given Degree of Stability by Regulators with Incomplete Information	72	123
G.S. Pospelov: Expert Systems. Experience with Dynamic Description	80	131
A.F. Gorshkov: A Method for Finding Extremal Subgraphs in Bipartite Graphs	85	136
V.A. Popov and P.Ya. Ekel': Fuzzy Set Theory and Problems of Controlling the Design and Operation of Electric Power Systems	92	143
Y.-K.L. Matitskas and G.S. Palubetskis: Graphs Cutting and 0-1 Quadratic Programming	100	152
Ye.S. Koneva: On the Use of *a priori* Information in the Construction of Guaranteed Procedures of Parameter Estimation and in the Classification of Recursive Processes	107	160
BRIEF COMMUNICATIONS		
R.A. Aliyev and M.I. Liberzon: Noniterative Coordination Algorithms in Two-Level Systems	114	163

V.A. Popov and P.Ya. Ekel': Fuzzy Set Theory and Problems of Controlling the Design and Operation of Electric Power Systems	92	143
Y.-K.L. Matitskas and G.S. Palubetskis: Graphs Cutting and 0-1 Quadratic Programming	100	152
Ye.S. Koneva: On the Use of *a priori* Information in the Construction of Guaranteed Procedures of Parameter Estimation and in the Classification of Recursive Processes	107	160
BRIEF COMMUNICATIONS		
R.A. Aliyev and M.I. Liberzon: Noniterative Coordination Algorithms in Two-Level Systems	114	163

	English Page	Russian Page
B.I. Gol'dengorin: Organization of Branchings for Solving Unification Problems by Correcting Algoirthms	119	167
L.V. Bordiyan: Game-Theoretic Analysis of a Class of Two-Level Hierarchical Control Systems with Lower-Level Links	123	170
G.L. Brodetskiy and A.V. Serpinskaya: Optimization of a type of Strategies of Periodic Information Storing in the Case of Multiprogramming with Time Quantization	127	173
L.V. Filosofov: Dynamic Recognition with Internal Teaching on the Basis of Teaching Sets of Attributes	132	182
A.I. Zhdanov and O.A. Katsyuba: Recursive Estimation of Parameters of Stochastic Linear Dynamic Systems with Output and Input Errors	139	191
V.G. Momdzhi: On Realization of Optimal Programmed Motion on a Moving Object	143	194
N.I. Glazunov and A.P. Goryashko: On Length Estimate of Revealing Tests for Classes of Inconstant Input Faults of Combination Circuits	147	197
G.L. Degtyarev and I.S. Rizayev: Parametric Synthesis of Locally Optimal Control in Discrete Systems with Distributed Parameters in the Case of Incomplete Measurement of State	150	200
L.A. Ivchenkov: Analysis of the Structure of a Control System for an Aggregated Object	154	204
V.V. Vasil'chikov and Yu.A. Mamatov: Models of Conflicts in the External Memory of Multiprocessor Systems Working in Multiprogramming Mode	159	209
V.M. Abramov: Characteristics of a Single-Line System in Which the Service Time Depends on the Queue Length	165	166
S.S. Veniaminov: On the Question of the Correctness of the Construction of Confidence Intervals for Variance	168	168
S.A. Yevseyeva: Equilibrium Solutions to Positional Dynamical Games of Nonfixed Duration	170	169
M.D. Davtyan: Optimization of the Structural Parameters of a Contactron for Attaining Its Maximal Reliability	175	176
A.Kh. Giorgadze and P.V. Mandzhgaladze: Cellular Automaton Model of the Growth of Multilink Chain	176	177
A.V. Panishev: The Dichotomy Method in the Three-Machine Problem	181	181
OBITUARY		
Academician Leonid Vital'yevich Kantorovich	188	232

Number 2

Yu. V. Malinkovskiy: Queueing Networks with Symmetric Standby Channels.	1	69
Yu. Nurges: Modal Control of a Bilinear System	10	84
O.M. Vlastovskiy and L.N. Lysenko: A New Approach to the Estimation of State Variable Functionals by a Minimal-Dimension Observer in the Presence of Noise	14	89
V.A. Gelovani, Yu.F. Pronozin and V.I. Rabover: Lowering the Dimensionality of Linear Dynamic Systems in the Problem of Tracking a Conic Domain	19	94
A.I. Zverev, A.I. Kibzun and V.V. Malyshev: A Generalized Minimax Approach to the Estimation Problem	23	98
A.I. Samylovskiy: A Local Structural Symptom in Some Problems of Identification of Gaussian Random Processes	30	105
A.A. Krasovskiy: Prediction and Optimal Automatic Control	40	115
torially Distributed Systems	54	187
A.S. Narin'yani: Indeterminancy in a System for Knowledge Representation and Processing	49	3
M.A. Mikheyenkova and V.K. Finn: A Class of Expert Systems with Incomplete Information	70	82
V.F. Khoroshevskiy: Development and Implementation of Expert Systems - The Instrumental Approach	89	104

	English Page	Russian Page
V.S. Rotenberg and S.V. Chesnokov: Virtuality of Names in the Process of a Dialog in Natural Language	98	115
T. Gergey and D.A. Pospelov: The LIVS Project: A Logical Informational and Computational System	108	128
Ya.I. Fet: Vertical Processing as Basis of Large-Block Architecture	116	139
Ye.Yu. Kandrashina: Means for Representing Time Information in Knowledge Bases	128	211
S.V. Emel'yanov, S.K. Korovin and I.G. Mamedov: Structural Transformations and Spatial Decomposition of Discrete Controlled Systems: The Quasi-Splitting Method	149	118
Yu.G. Smetanin and L.G. Khachiyan: Use of Pseudo-Polynomal Algorithms for Some Problems of Combinatorial Optimization with Constraints	161	139
Ye. Mitenkova: Model of Collective Interaction in Solving Group Problems	166	145
S.V. Gubin and A.M. Kovalev: On Constructing the Attainability Sets of Linear Nonautonomous Systems with Resource Constraints	175	155
BRIEF COMMUNICATIONS		
N.N. Karabutov: A Method for Solving a Matrix Lyapunov Equation	182	173
T.V. Ushakova and Ch. Kristauskas: Development Trajectories for Territorially Distributed Systems	187	187

Number 3

V.N. Vagin: Parallel Deduction on Semantic Networks	1	51
Ye.I. Yefimov: Determinational Calculus	10	62
P.S. Sapatyy: The Volna-O Language as the Basis of Navigational Structures for Knowledge Bases Built on Semantic Newtorks	30	198
A. Dvurechenskiy and G.A. Ososkov: On a Generalized Discrete Queueing System with Infinitely Many Servers	42	59
Kh.B. Kordonskiy, V.L. Rastrigin and Z.A. Shul'kin: Estimation of Reliability Indices When Several Failure Causes are Active	46	64
G.N. Cherkesov: Use of Spare Time in Single-Server Systems with Two Types of Failure	51	73
A.I. Kostogryzov and V.F. Matveyev: Analysis of the Use of a Combined Service Discipline in Real-Time Systems	57	79
I.V. Pavlov: Sequential Control and Estimation of System Reliability Indices Which Take Information on Elements Into Account	62	85
G.B. Rubal'skiy: Model of Inventory Control for Random Delays in Delivery and Periodic Replenishment Opportunities	72	95
I.B. Al'berton: Polynomial Algorithms for Problems in the Theory of Scheduling on "Narrow" Networks	82	161
D.I. Batishchev and D.I. Kogan: Transportation Problems with Linear Estimates of Participants	93	45
N.N. Vorob'yev: Game-Theoretic Version of the Maximum Principle with Discrete Partially Ordered Time	99	52
Ye.G. Gol'shteyn: A General Approach to Decomposition of Optimization Systems	105	59
E.D. Aved'yan and Ya.Z. Tsypkin: Optimal Methods for Processing Current and Accumulated Data	115	140
O.I. Larichev and Ye.M. Moshkovich: Method of Direct Classification and Problems of Obtaining Reliable Expert Information	124	151
O.M. Ryakin: Verification of Semantic Properties of Computations Based on Regional Invariants	135	143
M.Ye. Suchanskiy: Adaptive Algorithm for Determination of a Weakly Efficient Variant Under Randomness	148	164
BRIEF COMMUNICATIONS		
V.P. Mudrov: Dynamics Model of the Age and Qualification Structure of a Personnel System	158	179

	English Page	Russian Page
K.N. Abayyldanov and N.D. Astakhov: Problem of Determining the Optimal Order of Priority in Setting Up Production Centers	163	197
I.G. Pospelov and L.Ya. Pospelova: Dynamic Description of Production Systems and Consistency Test of Production Expert Systems	168	184
M.G. Gaft: Choice by Relation	178	192

Number 4

Ye.K. Gordiyenko, V.N. Zakharov and A.Yu. Mironov: Realization of Parallel Algorithms of Logical Interference on a VLSI Array Architecture	1	153
The Seventy-Fifth Birthday of Academician of the Ukrainian SSR Boris Vladimirovich Gnedenko	42	3
E.M. Kudlayev: Estimation of the Parameters of a Weibull-Gnedenko Distribution (A Survey)	44	5
I.N. Kovalenko and L.S. Stoykova: Some Extremal Problems in Reliability Theory	57	19
V.S. Korolyuk: The Failure Rate of Highly-Reliable Systems with Standby	62	24
Yu.K. Belyayev and A.P. Makarov: A Model with Estimation of an Absolutely Guaranteed Time of Failure-Free Operation	66	28
Ye.Ye. D'yakonova and A.D. Solov'yev: A Single-Line System with Group Serving Under Heavy Load Conditions	74	35
I.A. Ushakov: Optimal Standby Problems and a Universal Generating Function	79	40
V.V. Anisimov: Estimates of the Approximation of Flows of Weakly-Dependent Events by Poisson Flows	83	43
A.V. Pavlov: The Number of Orders in a Single-Channel System Under Heavy Load for Schrage Disciplines	90	50
T.A. Azlarov, Kh.M. Aripov and A.A. Dzhamirzayev: A Limit Theorem for the Joint Distribution of a Random Sum and the Number of Summands and Some of Its Applications	99	68
A.A. Shakhbazov: The Flow of Lost Orders in Systems with Finite Queue	104	105
Yu.F. Yakushev: The Joint Distribution of Queues in Some Two-Phase Systems with Nonordinary Flow	111	111
P.D. Krut'ko: Construction of Algorithms for Controlling Nonlinear Objects on the Basis of the Concepts of the Inverse Problems of Dynamics. Control of the Motion Relative to the Center of Mass	118	129
A.R. Belkin: Desirable Properties of Optimal Linear Rankings	128	3
S.K. Dulin: A Procedure to Reduce Structural Discordance in Knowledge Systems	144	22
D.G. Lakhuti and V.Sh. Rubashkin: Facilities and Procedures for the Conceptual Interpretation of Incoming Messages in a Natural Language	156	49

BRIEF COMMUNICATIONS

A.V. Pechinkin: A New Proof of Erlang's Formula for a Lossy Multichannel Queueing System	165	172
O.T. Mar'yanovich: The Invariance of the Convergence Rate of the Method of Accelerated Modeling of the Nonstationary Readiness Coefficient of an Alternating Process	169	175
A.G. Gadzhiyev: Control of Systems with Cyclic Instants of Start of Service	174	183
N.V. Chistyakova: Nonparametric Estimation of the Distribution Functions of the Service Times in Multichannel Systems	178	186
P.L. Logunov: Estimates of the Stability of Queueing Processes	182	189
A.I. Gromov: A Two-Phase Queueing System with Multiplicative Distribution of the Stationary Probabilities	184	190
V.A. Netes: A Two-Sided Estimate of the Mathematical Expectation of the Throughput of Two-Pole Networks with Unreliable Arcs	186	192
V.M. Abramov: The Distribution of the Supremum of the Queue Length of Queueing Systems with Poisson Input Flow	189	194

	English Page	Russian Page
Number 5		
A.P. Ivanov and G.S. Osipov: The Baisl Knowledge Representation Language	1	29
S.M. Yefimova: Representation of a Network Schema of a Data Base in the Form of a System of Special Linear Equations	14	43
I.A. Ushakov: Solution of Multicriterial Discrete Optimization Problems Using a Universal Generating Function	21	38
I.I. Yeremin: Duality and Approximation for Improper Problems of Mathematical Programming	28	70
V.I. Tsurkov: Some Classical Trends in the Decomposition of Large Dynamical Systems	39	82
B.N. Pshenichnyy: The Method of Linearization	48	92
A.S. Nemirovskiy: An Algorithm of the Karmarkar Type	61	105
Yu.G. Yevtushenko and V.A. Rat'kin: The Method of Half-Divisions for Global Optimization of a Function of Many Variables	75	119
V.Ye. Zhukovin, E.S. Korelov, and N.A. Laktionova: Fuzzy Multicriterial Problems in Decision Making with Incomplete Information	85	35
Ya. Ramik and J. Rimanek: Linear Constraints with Inexact Data	90	41
V.N. Vagin and A.V. Golovko: Deductive Data Bases in Control Systems	99	60
V.L. Stefanyuk: Some Aspects of the Theory of Expert Systems	110	85
T.V. Astakhova: Formation of Presuppositions and Assertions when Inputing a Natural-Language Text into a Computer	117	92
V.V. Araksyan: Some Properties of Directed Graphs of Dialogue Procedures	124	99
M.I. Sudeykin: Planning of Activity of Robots in Quasi-Dynamic Environments	127	102
E.F. Mitenkova: Investigation of the Conditions for Attaining Individual and Group Goals in a Small-Group Interaction	140	117
P.D. Krut'ko: Algorithms for Controlling Power Operations of Handling Robots	151	175
L.A. Chervinskaya: The Polynomial Equivalence of Problems of Search for Cuts Minimal with Respect to Size and to Inclusion	157	182
BRIEF COMMUNICATIONS		
L.A. Rastrigin: Sequential Binary Random Search in Problems of Stochastic Programming	163	177
S.V. Shil'man: Limitingly Optimal Filtering: Adaptive Kalman-Wiener Filters	173	208
V.A. Korneyev: Quasioptimal Correction of the Motion of an Airplane at Landing When There are Wind Disturbances	183	180
Number 6		
N.Z. Shor: Quadratic Optimization Problems	1	128
V.G. Gaytsgori and A.A. Pervozvanskiy: Local Criteria of Quality in the Optimization of Technological Complexes	12	162
O.I. Larichev, A.I. Mechitov, Ye.M. Moshkovich and Ye.M. Furems: A System for Identifying Expert Knowledge in Classification Problems	18	74
Yu.M. Solomentsev: Problems of Design and Technological Informatics	29	22
A.I. Grudev and A.A. Melikyan: Modeling the Dynamics of a Machining Section	38	32
D.E. Okhotsimskiy: Sensorization of Robots for the Adaptation and Control of Automatic Assembly	41	46
V.G. Gradetskiy, V.V. Nazarov, K.V. Samvelyan, V.P. Stepanov and F.L. Chernous'ko: The Dynamics of an Anthropomorphic Robot Which Operates as Part of a Flexible Robotic Welding Installation	52	50
A.P. Leonov and V.S. Medvedev: Microprocessor Control of the Drives of Machine Tools for Machining Printed Wiring Boards	64	64

	English Page	Russian page
P.D. Krut'ko and N.A. Lakota: The Inverse Dynamics Problems Method in the Theory of Constructing Algorithms for the Control of Manipulator Robots. The Stabilization Problem	73	82
Ye.S. Pyatnitskiy: Synthesis of the Control of Manipulator Robots Based on the Decomposition Principle	82	92
V.V. Avetisya, L.D. Akulenko and N.N. Bolotnik: Optimization of Control Modes in Manipulator Robots with Energy Expenditures Taken into Account	90	100
V.I. Babitskiy and A.S. Kovaleva: A Control of Resonant Manipulators that Minimizes Energy Expenditures	98	108
V.Ye. Berbyuk, M.V. Demidyuk and G.F. Ivakh: Problems of Optimizing the Structures and Laws of Control of the Motion of Electromechanical Manipulators	103	113
BRIEF COMMUNICATIONS		
Yu.Ye. Nesterov: The Technique of Nonsmooth Differentiation	113	199
A.P. Yeremeyev: A Production Model for Representing Knowledge Based on a Decision Table	124	196
R.Kh. Zaripov: A Production System in Music	135	207
A.V. Arutyunov, G.Z. Ber and N.T. Tynyanskiy: A Numerical Method of Solving Complete-Dimensional Optimal-Control Problems	147	163
F.A. Aliyev, B.A. Bordyug and V.B. Larin: Frequency Methods of Solving Matrix Algebraic Riccati Equations	154	169
Yu.R. Kotta: The Ensuring of Autonomy of a Nonlinear Dynamical System with Discrete Time	161	175
V.A. Kaminskas and E.I. Sakalauskas: An Algorithm for the Identification of Linear Distributed-Parameters System	167	184
Ye.V. Burtseva: A Class of Linear Speed-Optimal Problems Which Do Not Satisfy the Condition of Position Generality	172	189
